Dear Mr. Plotkin,

re US Patent Application No. 10/056178
"Multi-Path Dynamic Routing Algorithm"
Caly Corporation

You may know that last year Caly Corporation sold its assets, including various patents and patent applications, to an English company Radiant Networks Plc. I am the patent attorney who acts for Radiant Networks Plc. I am sure that Mr Kevan Nasser will be happy to confirm this for you.

The above US patent application was filed as a so-called continuation of the original US patent application no. 09/589631 for which you are one of the named inventors. Apparently, at the time this continuation application was filed, Caly Corporation were unable to contact you for your signature, which is required for certain forms by the US Patent Office. We have now been set a due date by which the forms having your signature must be filed.

Accordingly, I should be very grateful if you would let me know by return whether you are willing to sign the necessary forms. If so, please let me have a postal address to which I can send the forms.

I look forward to hearing from you as soon as possible and thank you in advance for your assistance.
